APPRENTICESHIP DELIVERY PLATFORM

GROWN FROM EVIDENCE. *BUILT TO LAST.*

The quality-first platform for apprenticeship providers. Encode your standard as rules, see cohort risk before the review meeting, and know every piece of evidence is authentic.

*O*UTSTANDING | *A*CHIEVABLE | *K*NOWLEDGEABLE | *S*UPPORTIVE

01 EVIDENCE & KSBS

02 QUALITY & IQA

03 DELIVERY & REVIEWS

04 INTEGRITY & TRUST

APPRENTICESHIPS ARE WON LONG *BEFORE GATEWAY.*

Most providers run delivery across a patchwork of spreadsheets, inboxes and shared drives. By the time a problem surfaces, it is already expensive. Oaks gives tutors, IQA, employers and leaders one living record for every apprentice, so risk shows up while there is still time to act.

WITHOUT ONE LIVING RECORD	WITH OAKS
× Evidence scattered across drives, inboxes and spreadsheets.	✓ Every KSB with the evidence that proves it mapped beside it. KNOWLEDGE GROVE
× Delivery risk discovered in the review meeting.	✓ Six threshold metrics flag cohort risk before the meeting, not after it. LEARNER RAG
× Gateway surprises from standards applied unevenly.	✓ Your standard encoded as rules at task, KSB, programme and gateway level. CONSISTENCY RULE ENGINE
× IQA sampling run from a spreadsheet.	✓ Risk-led samples that build themselves into a personal queue. IQA ENGINE
× Employers chased by email for signatures and hours.	✓ Line managers sign off reviews and verify hours in their own portal. EMPLOYER PORTAL
× No easy way to tell whether work is the learner's own.	✓ AI-content and plagiarism checks on every piece of evidence. AI ASSESSMENT INTEGRITY

"One living record, from first evidence to gateway and beyond."

25	4	5	1
LIVE CAPABILITIES	CORE PILLARS	ROLES, ONE RECORD	DEDICATED INSTANCE PER PROVIDER

THE LEARNER JOURNEY

FROM ACORN *TO MIGHTY OAK.*

Every apprentice starts as potential. One record follows them from enrolment to gateway, so nothing is lost between teams and every stage builds on the last.

01 · ENROL

Planted properly

Multi-step enrolment, employer e-signatures and the apprenticeship agreement, all done before day one.

Enrolment · E-signatures

02 · DIAGNOSE

Know the soil

Skillscan gathers the learner and line manager view, RPL records prior learning, and adaptive diagnostics set a fair starting line.

Skillscan · RPL · Diagnostics

03 · DELIVER

Steady growth

Tasks and training plans map straight to KSBs. Off-the-job hours are logged by learners and verified by employers.

Tasks · Training plans · OTJ

04 · EVIDENCE

Rings in the trunk

The Knowledge Grove shows every KSB with its evidence beside it, and AI integrity checks run where tutors mark.

Knowledge Grove · AI integrity

05 · REVIEW & ASSURE

Tended, not left to chance

Live tripartite reviews, risk-led IQA sampling and consistency rules that catch problems long before gateway.

Reviews · IQA Engine · Rule engine

06 · GATEWAY & BEYOND

A canopy of its own

Leadership sees gateway readiness in the RAG and Snapshot. Graduates carry verified proof of their skills with Oaks Ascend.

Learner RAG · Snapshot · Ascend

FOUR ROOTS.
ONE LIVING RECORD.

01 EVIDENCE & KSBS

Every knowledge, skill and behaviour, with the proof mapped beside it.

Knowledge Grove
A KSB-first evidence drawer. Learners see every knowledge, skill and behaviour and exactly what proves it.

Tasks & Training Plans
Set work once, reuse it everywhere. Tasks map straight to KSBs so progress updates itself.

Adaptive Diagnostics
Initial assessment that adapts to each learner, calibrated nightly from real responses.

Oaks Ascend
A verified career profile for graduates. Portable proof of skills that outlives the programme.

Gateway Packs & EPA Results
What was declared at gateway is frozen in a pack. Resits and retakes stay attached to it, and a passing EPA result is written back to the learning aim.

Skills England Sync
Type a standard reference and Oaks pulls the course, its KSBs, its options and the minimum off-the-job hours straight from Skills England.

02 QUALITY & IQA

Your standard encoded as rules, with risk surfaced before the review meeting.

Consistency Rule Engine
Encode your standard as rules at task, KSB, programme and gateway level. No more gateway surprises.

Learner RAG
Delivery risk across the whole cohort, before the review meeting rather than after it.

IQA Engine
Risk-led sampling that builds itself, with a sampling matrix that shows planned against actual for every assessor. Your IQA team works a queue, not a spreadsheet.

Ofsted Workspace
Your inspection evidence in one room, with a learner journey PDF ready for every deep dive and read-only logins for inspectors.

Ofsted AI
An AI Ofsted inspection you can talk to. Alana, our AI inspector, asks the questions from the September 2026 FE and skills toolkit, weighs the evidence you show her and leaves a practice report card.

OBTLA AI
Observation of teaching and learning, without the clipboard. Alana joins your Microsoft Teams, Zoom, Google Meet or Webex lesson as a muted guest and drafts the observation for your observer to check, grade and send to the tutor.

Quality Hub
Observations of teaching and learning, audits, safeguarding and CPD in one place, ready for inspection.

Oaks Snapshot
A scheduled executive brief. RAG and gateway readiness land in leadership inboxes on your cadence.

FOUR CORE PILLARS

DELIVERED DAILY. *TRUSTED THROUGHOUT.*

03 DELIVERY & REVIEWS

Tutors, learners and employers working one live record, not three inboxes.

Live Progress Reviews
Tripartite reviews co-edited in real time and signed by learner, employer and tutor.

Off-the-Job Hours
The minimum comes from Skills England, learners log it, employers verify it, and the variance feeds straight into cohort risk.

Action List
One list of what each tutor needs to do next, with a count in the menu. Work ticks itself off when it is done.

Employer Portal
Line managers see what needs them, sign off reviews and verify hours without chasing emails.

Enrolment & Skillscan
From first form to signed agreement, with prior learning captured from every angle.

Reports Library
Ready-made reports for every team, newest first. Deprivation from home postcodes, missing enrolment files and learners in care sit beside progress, off-the-job and EPA.

Messaging & Policies
Conversations, announcements and policy sign-off inside the record, not scattered across inboxes.

Shaped to Your Organisation
Training provider, college, university, employer provider or charity: tell Oaks what you are and it speaks your language, from apprentices or students to terms or semesters.

04 INTEGRITY & TRUST

Authentic evidence and a platform your auditors can trust.

AI Assessment Integrity
AI-content and plagiarism checks on every piece of evidence, right where tutors mark.

Secure by Design
Your own dedicated instance, two-factor sign-in and a full audit trail.

Welfare, Prevent & British Values
Welfare checks, Prevent discussions and British Values coverage logged on the learner record. A safeguarding flag alerts every DSL straight away.

ONE RECORD.
FIVE POINTS OF VIEW.

Everyone who shapes an apprenticeship works from the same live record, each with a view built for the job they do.

01 LEADERSHIP

See the whole grove at a glance.

Cohort risk, gateway readiness and quality evidence in one place, with a scheduled brief landing in your inbox on your cadence.

Consistency Rule Engine · Gateway Packs & EPA Results · Skills England Sync · Learner RAG · IQA Engine · Ofsted Workspace · Ofsted AI · OBTLA AI · Quality Hub · Oaks Snapshot · Enrolment & Skillscan · Reports Library · AI Assessment Integrity · Secure by Design · Shaped to Your Organisation · Welfare, Prevent & British Values

02 IQA

Work a queue, not a spreadsheet.

Risk-led sampling builds itself, with plans, actions, observations and moderation recorded as you go.

Consistency Rule Engine · IQA Engine · Ofsted Workspace · Ofsted AI · OBTLA AI · Quality Hub · AI Assessment Integrity

03 TUTORS

Less chasing, more teaching.

Set work once, co-edit reviews live and mark with integrity checks sitting beside the evidence.

Knowledge Grove · Tasks & Training Plans · Adaptive Diagnostics · Consistency Rule Engine · Gateway Packs & EPA Results · Skills England Sync · Learner RAG · OBTLA AI · Live Progress Reviews · Off-the-Job Hours · Action List · Messaging & Policies · AI Assessment Integrity · Welfare, Prevent & British Values

04 LEARNERS

Know exactly where you stand.

Every knowledge, skill and behaviour with the evidence that proves it, and a verified career profile to keep.

Knowledge Grove · Tasks & Training Plans · Adaptive Diagnostics · Oaks Ascend · Live Progress Reviews · Off-the-Job Hours · Enrolment & Skillscan · Messaging & Policies

05 EMPLOYERS

Stay involved without the email trail.

Sign off reviews, verify off-the-job hours and follow progress from a portal built for line managers.

Oaks Ascend · Live Progress Reviews · Off-the-Job Hours · Employer Portal · Enrolment & Skillscan · Messaging & Policies

KNOW IT'S *THEIR OWN WORK.*

AI-content and plagiarism checks on every piece of evidence, right where tutors mark.

- AI-generated content detection
- Plagiarism checks
- Per-evidence results on assessment logs
- Text comparison

HOW IT WORKS

1

Evidence submitted

Learners upload their work to the evidence drawer as usual.

2

Checked automatically

Each piece is checked for AI-generated content and plagiarism.

3

Tutors decide

Results sit on the assessment log, beside the evidence they mark.

Pair it with the Consistency Rule Engine. Rules are enforced from the same assessment screen, so your standard and your integrity checks meet in one place.

Usage-based, no extra system. Included from Oaks Quality upwards, and available as the AI checks add-on.

CARE, WRITTEN *INTO THE DNA.*

Our companion safeguarding platform for the Windows devices your learners use. It spots risk early, gives learners a direct line to help and keeps every concern on record, without ever recording what they type.

- Keystrokes are never stored
- Context capped at 80 characters
- Warning views and decisions audited
- Automatic retention pruning
- DPIA checklist included

Watch words, matched on the device

Your safeguarding phrase list is checked on the learner's device. A match raises a warning carrying only the phrase, a short snippet of context and the app it came from.

Warnings triaged by severity

Safeguarding officers work a queue ranked from low to critical, with an optional screenshot captured on high and critical warnings.

Concerns, properly recorded

Escalate a warning into a concern with notes, an owner and a printable PDF report for your safeguarding records.

Help, one click away

Learners open the acorn in their system tray for emergency numbers, live chat with your safeguarding team, or to raise a concern themselves.

Blocked websites

Keep your own blocklist, sync trusted external lists overnight and push changes out to every device.

Accountable by design

Roles for admins, safeguarding officers and viewers, two-factor sign-in, an audit trail of warning views and decisions, and automatic retention pruning.

Help, one click from the tray
Plus your own safeguarding team's number

Childline	Samaritans	NHS 111	Shout

Available alongside any Oaks licence or on its own, running on its own servers.

ADD-ONS & DEVELOPER SUPPORT

GROW THE *MODULES YOU NEED.*

Choose your add-ons when you order. Your instance switches on exactly what you have licensed, and more can be added as you grow.

TUTORS & STAFF

- Tutor competence
- Staff wellbeing
- Caseload map

LEARNERS & ENROLMENT

- Enrolment e-signatures
- Skills scans
- Learner activities
- Diagnostics
- Careers (CEIAG)
- Ascend

EMPLOYERS

- Employer workspace
- Employer levy (DAS)

WORKSPACES

- IQA
- Quality workspace
- Ofsted workspace
- Management workspace
- Safeguarding workspace

INSIGHT & REPORTS

- Reports
- Oaks Snapshot

SALES

- Sales & leads

AI & INTEGRATIONS

- AI checks
- Ofsted AI (AI Ofsted inspection) BY THE HOUR
- OBTLA AI (observation of teaching and learning) BY THE HOUR
- Microsoft 365
- ILR returns
- Oaks DNA OWN PLATFORM

NEXUS DEVELOPER SUPPORT

Straight to the people *who build Oaks.*

Raise and track tickets directly with the Oaks developers through our Nexus helpdesk. No extra servers needed.

- ✓ No middle man between you and the code
- ✓ Raise tickets directly with the developers
- ✓ Track every ticket through to resolution

COMING SOON

STILL *GROWING.*

Oaks grows season by season. These are on the roadmap now, and we are always clear about what is live today and what is still to come.

FUNDING

ILR Export & Evidence Packs

Funding-grade exports and audit evidence packs for providers who want one system.

FUNDING

Self-healing ILR

An AI preflight that finds ILR errors before the ESFA does, and fixes the routine ones for you.

FUNDING

Revenue Rescue Engine

Spots funding clawback risk while there is still time to act, not at audit.

QUALITY & IQA

Predictive Flight Risk

Machine learning that flags learners likely to withdraw weeks before the warning signs are obvious.

DELIVERY & REVIEWS

What To Do Today

The Action List, ranked by risk, so every tutor starts the day knowing who to see first.

EVIDENCE & KSBS

Single-screen Grading

Evidence, criteria, integrity results and feedback side by side. Mark a submission without changing tab.

QUALITY & IQA

Learner Journey Time Machine

Replay any learner's journey, week by week, so inspectors see the impact rather than a spreadsheet.

INTEGRITY & TRUST

Safeguarding Panic Button

One tap for a learner to reach your safeguarding team, with instant triage for the DSL.

EVIDENCE & KSBS

Direct EPAO Portfolio Hand-off

Send a gateway-ready portfolio straight to the end-point assessment organisation, no exports.

DELIVERY & REVIEWS

Passive OTJ Logger

Off-the-job hours suggested from the learner's calendar, so logging takes seconds, not Friday afternoons.

EVIDENCE & KSBS

AI Evidence Assistant

Learners capture evidence from Teams or their phone and it lands in Oaks, mapped to the right KSBs.

Roadmap items are not yet available and are never sold as live. Timings and scope may change, so ask us for the latest during your demo, and tell us what your team needs next.

DEDICATED, SECURE HOSTING

YOUR OWN OAK. *NEVER A SHARED PLOT.*

Every Oaks customer gets a dedicated, single-tenant instance with its own application servers and its own database, built and managed for you. Nobody else's learners, nobody else's load.

yourname.oakshub.co.uk

or your own domain, such as learn.yourprovider.co.uk

- Dedicated single-tenant instance
- Two-factor authentication
- Role-based permissions
- Activity log on every change
- HTTPS certificates issued automatically
- Hosted in a London data centre

Using your own domain carries an additional setup and administration fee, confirmed on your invoice.

PLANT YOUR OAKS *IN THREE STEPS.*

01

Book a demo

Thirty minutes on your own standards and KSBs, with the rule engine, RAG and IQA Engine working.

02

Choose your licence

Pick a tier and add-ons, then size three seat pools: learners, staff and management.

03

We build your instance

Your dedicated instance is built for you at yourname.oakshub.co.uk, ready for onboarding.

TIERS

Licensed to fit your cohort

Seats are licensed separately for each instance. Ask us for a quote.

FOR QUALITY LEADS AND COOS

Oaks Quality

The quality engine: encode your standard and see cohort risk early.

- Consistency rule engine
- Learner RAG
- Live progress reviews
- Knowledge Grove and KSB gap views
- IQA Engine
- AI assessment integrity (usage-based)

MOST CHOSEN

FOR HEADS OF DELIVERY

Oaks Delivery

Everything in Quality, plus the portals your learners and employers use every day.

- Everything in Oaks Quality
- Learner and employer portals
- Off-the-job hours with employer verification
- Skillscan and RPL
- Enrolment with e-signatures
- Adaptive diagnostics

FOR LARGE AND MULTI-SITE PROVIDERS

Oaks Enterprise

Delivery at scale, with dedicated support and integration help.

- Everything in Oaks Delivery
- Seat pools sized for multi-site teams
- Dedicated instance and custom domain
- Onboarding and data migration support
- Premium support

Oaks Funding is on the roadmap.

PLANT YOUR OAKS

SEE YOUR OWN *INSTANCE GROW.*

A walkthrough built around your standards, your cohort and your gateway pain. Honest about what is live and what is on the roadmap.
